

iPass Expands Canadian Wi-Fi Presence with Award-Winning One Zone™ Wireless Network

Partnership with Cogeco Data Services helps businesspeople avoid 3G international roaming charges when using their laptops and smartphones throughout downtown Toronto.

REDWOOD SHORES, Calif. — June 23, 2009— iPass Inc. (NASDAQ: IPAS) today announced the expansion of its North American Wi-Fi footprint with the addition of the One Zone™ Wi-Fi network in Toronto, part of a partnership with Cogeco Data Services. Effective immediately, iPass Mobile Office customers traveling to Toronto can avoid 3G roaming charges by using the One Zone Wi-Fi network as part of their existing iPass Enterprise Flat Rate price plan. Hundreds of Global 2000 companies use iPass and in 2008, over 2 million unique users took advantage of iPass mobility services.

Under the partnership agreement with Cogeco Data Services, iPass has integrated One Zone—considered one of the largest, urban Wi-Fi networks in North America—into the iPass Global Broadband Roaming Network. The One Zone Wi-Fi network provides iPass customers with seamless, cost effective Internet access in the heart of Toronto’s downtown business and entertainment district.

Significantly, the Toronto One Zone network was named “Best Overall Metro Wi-Fi Service” in a study conducted by analyst firm Novarum. The full survey can be found [here](#).

“We’re proud to operate one of the top urban Wi-Fi networks in North America, and we’re pleased to extend the benefits of One Zone to iPass customers, who will appreciate its speed, performance and reach throughout Toronto,” said Ian Collins, acting president, Cogeco Data Services.

As with all providers that join the iPass network, the One Zone Wi-Fi network has passed rigorous Enterprise-Ready certification testing, which helps to ensure security, reliability, performance and compatibility with enterprise systems.

“As one of the world’s top financial centers, Toronto is an important business hub for many of our customers, who demand connectivity speed and performance while avoiding high roaming charges,” said Piero DePaoli, senior director of global product marketing, iPass. “Using the iPass Mobile Office service helps businesspeople avoid high 3G international roaming charges on their 3G enabled laptop or smartphone when they travel to Canada.”

Using iPass software and services, companies can provide their global workforce with the industry's broadest variety of remote and mobile access choices, complete with web-based management of connectivity and devices, and delivered through the easy-to-use iPassConnect™ mobility manager software. The iPass global virtual network covers more than 160 countries and includes 3G mobile broadband in the U.S., Europe and Asia, 120,000 Wi-Fi hotspot and Ethernet locations, fixed broadband and dial-up today, with the ability to add 4G technologies such as WiMAX and LTE in the future.

About iPass Inc.

iPass helps enterprises unify the management of remote and mobile connectivity and devices. With iPass software and services, customers can create easy-to-use broadband solutions for their mobile workers, home offices, and branch and retail locations, complete with device management, security validation, and unified billing. iPass offerings are powered by its leading global virtual network, on-demand management platform, and award-winning client software. The iPass global virtual network unifies hundreds of wireless, broadband and dial-up providers in over 160 countries. Hundreds of Global 2000 companies rely on iPass services, including Ford, Nokia, and Procter & Gamble. Founded in 1996, iPass is headquartered in Redwood Shores, Calif., with offices throughout North America, Europe and Asia.

About Cogeco Data Services

Cogeco Data Services is a data communications provider that supplies its business customers with the fast, reliable and secure ability to access, manage, move and store large amounts of data worldwide. The company's wholly-owned, redundant network is all-optical, and offers near limitless bandwidth with services that scale to meet the needs of some of Canada's largest public companies and public sector organizations. www.cogecodata.com

The Company's One Zone wireless service, rated the fastest Wi-Fi service in North America by Novarum Research, is a consumer service located within downtown Toronto. The network is designed to promote user mobility and is ideal for users who want Internet access on the go. www.onezone.ca
